

# Making things: locally

Manufacturers are facing a shortage of skilled labour. Overall headcount is expected to grow over the next decade, and as older workers retire, small and medium manufacturers (SMMs) need to attract, hire, retain, and develop the next generation of skilled workers.

Automation technology enhances worker productivity, improves safety, enhances decision making, and empowers your team to do their jobs more effectively.

## A design-centric approach to automation technology

JAE Automation takes a design-centric approach to automation technology. We look at how technology and workers interact and find ways that technology can improve quality of life for employees. Our customers succeed while providing better, safer jobs that are enabled by technology.

## Empowering your team with technology

Automation isn't about cutting jobs. Instead, technology allows SMMs to retain workers, shift skilled team members to more value-added roles, and keep employees engaged and motivated.

Skilled workers are your most valuable resource. By providing your team with the right technology you can create an environment that fosters innovation, embraces new approaches, and delivers value to customers and team members.

## Expertise in

- Automation Consulting
- Electrical Control Design
- Electrical Process Drawings
- Manufacturing Safety
- PLC/HMI/SCADA Programming
- Vision Systems
- Robot Integration
- Utilities Information and Control
- Mechanical Design
- 3D Modelling
- Mechanical Drawings
- Packaging Line Integration
- Robot Cells
- Database Programming
- MES Systems
- Custom Builds and Installation
- Onsite Commissioning and Start Ups
- Reporting
- Remote Monitoring
- Support and Maintenance

## Get in touch
